MedicalWorks®

MedicalWorks® is a cost-effective, straightforward, and professional medical software application that contains the tools and technology necessary to function efficiently in your medical facility.

MedicalWorks® was designed and developed with the help of doctors, nurses, and other healthcare providers. Unlike other medical software applications, MedicalWorks® provides a complete solution to all your software needs in one user-friendly package. Therefore, it eliminates the need to convert or transfer data from one software module to another. MedicalWorks® is HIPAA compliant and compatible with all Operating Systems. Furthermore, it seamlessly interfaces data from existing databases (medical records, billing, and scheduling) to prevent any loss of valuable information.

Easy to learn, easy to use

With MedicalWorks®, entering patients' information is as easy as filling out basic admissions forms. The User Interface and unique icons of MedicalWorks® were designed specifically for the medical community. Users can easily learn to use the application from the tutorial available on the Menu page. Furthermore, users can learn about specific features by clicking the Help Menu at anytime

A complete solution

MedicalWorks® offers a comprehensive range of medical management capabilities that save you money and time. With this application, you can print schedules for your entire staff or set it to generate automatically emails reminding them of important functions or holidays. You can securely retrieve, view, and store patients' general and medical information from anywhere within your network. A patient report can be generated with the click of a button. However, security is priority of MedicalWorks® only allowing authorized users to access patient files and records. MedicalWorks also provides you with the ability of creating a MedCard®.

MedCard®

MedicalWorks® can easily create a credit-card sized patient information card called, MedCard®. It is easily carried in a wallet or purse and it can provide vital information to medical personnel that can save the patient's life in the case of an emergency. The card is secured with 128-bit encryption and can only be accessed by authorized medical personnel. Patients can go to any medical facility equipped with MedicalWorks® and have their information securely read from the card without having to go through the cumbersome task of filling out numerous admissions forms.

Medical Records

At the heart of MedicalWorks® is a secure environment that makes creating, managing, and storing patients' general and medical information time efficient and

trouble-free. Personnel can securely view a patients' medical history, such as allergies, medications, previous visits, and other things at the click of a button. Are you the type of Doctor that is required to check-up on your patients while on the go? MedicalWorks® also provides controlled access to patients' medical records remotely by providing access to the database through any portable device with an internet connection such as PDA's and Tablet PC's. Therefore, you can read progress notes from nurses, or leave a note for your nurse in regards to the treatment of one or more patients.

Scheduling

With the ability to generate schedules for your staff, you will never have staffing issues in your medical facility again, thus making it more profitable and efficient. MedicalWorks® takes this even further by allowing you to generate schedules for staff within each unit in your medical facility.

MedicalWorks® also provides patient appointment scheduling capabilities. You can keep track of who is currently visiting your facility, when others are coming in, and which specialist they are coming to see.

HIPAA compliant

MedicalWorks® is HIPAA compliant in all areas, and will continue to be compliant as new standards are released. Ensuring the privacy, integrity, and security of your patient's information is of the utmost priority and can make the difference in the success of your health care practice. Therefore, we have taken major steps using today's technology in ensuring optimum security, privacy, and integrity of all medical information.

Dedicated support

MedicalWorks® has a dedicated support system, giving you have access to help in a variety of forms whenever you need it:

- A comprehensive built-in help manual
 - A 24-hour forum or message board
 - LISTSERV® lists
 - Free technical support
-
